

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1           1. (currently amended) An image display method for  
2 displaying description data having text information and image  
3 information described in a predetermined description format,  
4 said image display method comprising the steps of:  
5           extracting attribute values from the description data  
6           indicating attributes for specifying the image  
7           information ~~from the description data~~;  
8           listing the extracted attribute values;  
9           selecting at least one attribute value from among the  
10           listed attribute values; and  
11           reading and displaying the image information specified by  
12           the selected attribute value.

1           2. (original) The image display method as claimed in  
2 claim 1 wherein said step of listing the extracted attribute  
3 values lists alternative character strings to images inline  
4 displayed in the description data.

1           3. (original) The image display method as claimed in  
2 claim 1 wherein said step of listing the extracted attribute  
3 values lists file names indicating locations of images inline  
4 displayed in the description data.

1           4. (original) The image display method as claimed in  
2 claim 3 further comprising the steps of selecting a format of  
3 images inline displayed in the description data based on the  
4 attribute values and listing images in the selected file  
5 format.

1           5. (currently amended) A portable terminal comprising:

2 a display section for displaying description data having  
3 text information and image information described in  
4 a predetermined description format;  
5 image selection and display means for extracting  
6 attribute values from the description data  
7 indicating attributes for specifying the image  
8 information ~~from the description data~~, listing the  
9 extracted attribute values, selecting at least one  
10 attribute value from among the listed attribute  
11 values, reading the image information specified by  
12 the selected attribute value, and displaying the  
13 image information on the display section.

1 6. (original) The portable terminal as claimed in claim 5  
2 wherein the attribute values are alternative character strings  
3 to images inline displayed in the description data.

1 7. (original) The portable terminal as claimed in claim 5  
2 wherein the attribute values are file names indicating  
3 locations of images inline displayed in the description data.

1 8. (original) The portable terminal as claimed in claim 7  
2 wherein further a format of images inline displayed in the  
3 description data is selected based on the attribute values,  
4 images in the selected file format are listed, and an image in  
5 any desired format is displayed on the display section.

1 9. (new) A display method for displaying a representation  
2 of a document on a portable display, said document having one  
3 or more images, wherein the document is described in a data  
4 file using a predetermined description language, said display  
5 method comprising the steps of:

6 extracting, from the data file, corresponding attribute  
7 values for each of the one or more images;

8 listing the corresponding attribute values on the  
9 display;  
10 selecting at least one of the listed attribute values;  
11 and  
12 displaying, on the portable display, image information  
13 about the image corresponding to the selected  
14 attribute value.

1 10. (new) The method of claim 9, wherein said image  
2 information includes a textual description of the image.

1 11. (new) The method of claim 9, wherein said image  
2 information includes a graphical representation of the image.

A 1 12. (new) The method of claim 9, wherein said image  
2 information includes information about a file of the image.

1 13. (new) The method of claim 9, wherein said image  
2 information includes an indication as to whether the image can  
3 be displayed.

1 14. (new) A method of displaying, on a portable display,  
2 a web page described by one or more data files, said web page  
3 having one or more images, said method comprising the steps  
4 of:

5 extracting, from the one or more data files,  
6 corresponding attribute values for each of the one  
7 or more images;

8 listing the corresponding attribute values on the  
9 portable display;

10 allowing a user to select one of the listed attribute  
11 values; and

12 displaying, on the portable display, image information  
13 about the image corresponding to the selected

14 attribute value, wherein said image information  
15 includes a non-graphical representation of the  
16 image.

1 15. (new) The method of claim 14, wherein said non-  
2 graphical representation of the image includes a textual  
3 description of the image.

1 16. (new) The method of claim 14, wherein said non-  
2 graphical representation of the image includes information  
3 about a file of the image.

A1  
1 17. (new) The method of claim 14, wherein said image  
2 information further includes a graphical representation of the  
3 image.

1 18. (new) The method of claim 14, wherein said non-  
2 graphical representation of the image includes an indication  
3 as to whether the image can be displayed by the portable  
4 display.
